ABOUT ME

I'm a Malaysian who has passed his 10th year in Norway! Of all the things I do, I enjoy being a Father the most. I learn as much from my children as they hopefully learn from me. I consider myself an "academic" as a result of the 5 years I spent doing research as part of a PhD program at the Informatics Dept. at the Univ. of Oslo. Apart from Father and Academic, I am a 100% WoW-Man. I have been involved with the Way of Work project since 2008 (before it was a project) to its close in Feb 2010. After that with a team in Group PSO to develop the concept and platform further. And now with the Operational Excellence team in Corporate Development. In the OE team, I belong to the Organisational Design and Work Smarter competency clusters. I also play the (part time) role of Collaboration Manager in Group Units.

The WoW project is much more than technical solutions and services. In order to realize our true potential, we in Telenor must change the way we think and act. To ensure the right usage of our common virtual workspace we recommend all our users to take some time to get to know the virtual workspace.

The different WoW tools have qualities that go far beyond what meets the eye. Learn more about tools as such and possibilities they represent by visit the WoW Learning Centre.
